

Downloading and installing Android Studio

- The Android Studio package can be downloaded from the following web page :
<http://tools.android.com/download/studio/builds/1-5>
- The package is available for Windows, Linux and Mac operating systems.
- For Windows system, you can download IDE and the SDK Bundle or IDE alone.

The screenshot shows the 'Android Tools Project Site' with a green Android robot logo in the top left. A search bar is in the top right. The main content area is titled 'Android Studio 1.5' and includes a breadcrumb trail: 'Download > Android Studio Downloads > Android Studio Builds >'. Below the title, there is a date 'November 17th, 2015' and a paragraph about the release, with links to a 'release announcement' and a 'main developer site'. The 'Installation' section follows, explaining that the release is in the stable channel and providing instructions for checking for updates. It then lists download links for Windows (IDE + SDK bundle, IDE only, and Plain .zip file) and Mac (DMG and Plain .zip file). The Linux section provides a link for the Plain .zip file. On the left side, there are two vertical menus: 'Project Info' with links like 'Projects Overview', 'Screenshots', 'Release Status', 'Download', 'Preview Channel', 'Recent Changes', 'Technical docs', and 'New Build System'; and 'Contrib info' with links like 'Build Overview', 'Contributing', 'Feedback', and 'Filing Bugs'.

Android Studio 1.5

November 17th, 2015: For information on what's new in 1.5, see the [release announcement](#). For additional information about Android Studio, see the [main developer site](#).

Installation

The release is available in the stable channel, so you can check for updates via Help > Check for Update... (on OSX, look in the Android Studio menu). This will download and install a patch rather than download a full IDE image.

Windows:

IDE + SDK bundle: <https://dl.google.com/dl/android/studio/install/1.5.0.4/android-studio-bundle-141.2422023-windows.exe> (1.1 GB)
IDE only: <https://dl.google.com/dl/android/studio/install/1.5.0.4/android-studio-ide-141.2422023-windows.exe> (335 MB)
Plain .zip file: <https://dl.google.com/dl/android/studio/ide-zips/1.5.0.4/android-studio-ide-141.2422023-windows.zip> (358 MB)

Mac:

DMG: <https://dl.google.com/dl/android/studio/install/1.5.0.4/android-studio-ide-141.2422023-mac.dmg> (350 MB)
Plain .zip file: <https://dl.google.com/dl/android/studio/ide-zips/1.5.0.4/android-studio-ide-141.2422023-mac.zip> (360 MB)

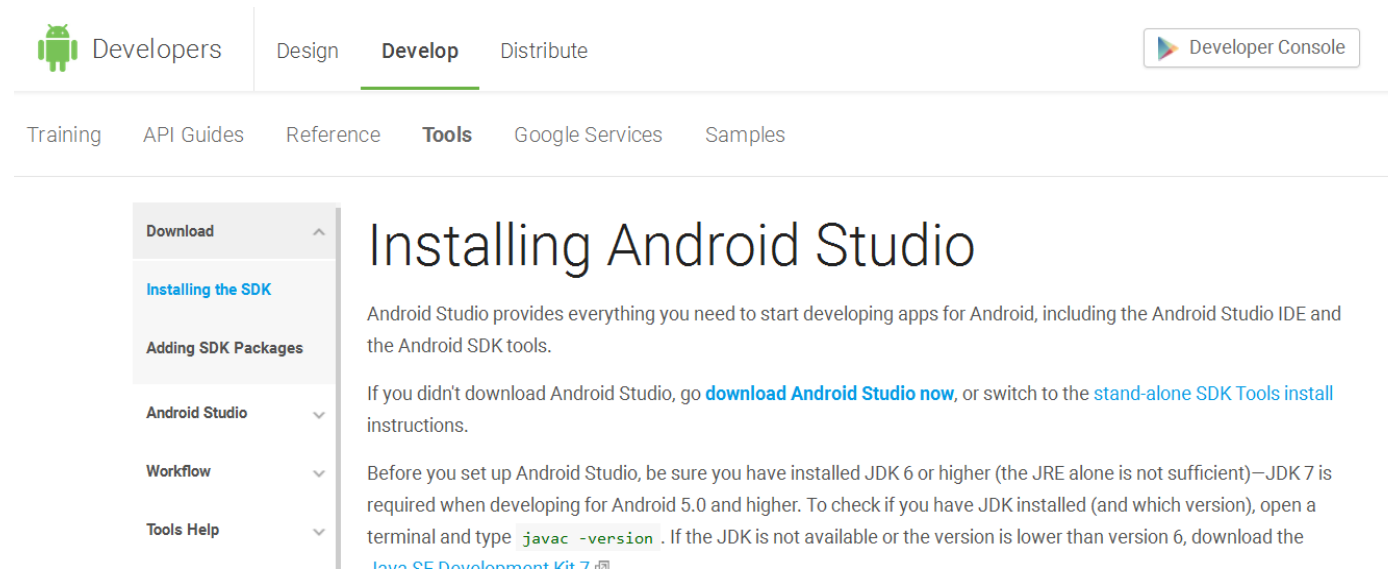

Linux:

Plain .zip file: <https://dl.google.com/dl/android/studio/ide-zips/1.5.0.4/android-studio-ide-141.2422023-linux.zip> (363 MB)

- Once Android Studio downloaded, the exact steps to install Android Studio depending on the operating system on which the installation is being performed.
- Installation instructions for Windows, Linux and Mac OSX platforms can be found from the following web page :

<http://developer.android.com/sdk/installing/index.html?pkg=studio>

- The installation of Android Studio may take some time.

The screenshot shows the 'Develop' tab of the Android Studio installation page. The left sidebar contains a 'Download' menu with options: 'Installing the SDK' (highlighted), 'Adding SDK Packages', 'Android Studio', 'Workflow', and 'Tools Help'. The main content area is titled 'Installing Android Studio' and contains the following text:

Android Studio provides everything you need to start developing apps for Android, including the Android Studio IDE and the Android SDK tools.

If you didn't download Android Studio, go [download Android Studio now](#), or switch to the [stand-alone SDK Tools install instructions](#).

Before you set up Android Studio, be sure you have installed JDK 6 or higher (the JRE alone is not sufficient)—JDK 7 is required when developing for Android 5.0 and higher. To check if you have JDK installed (and which version), open a terminal and type `javac -version`. If the JDK is not available or the version is lower than version 6, download the [Java SE Development Kit 7](#).

- When the installation is finished you can launch Android Studio and the following screen appears.
- As long as you don't have this screen, it is not possible to go to the next step.
